

- NOTES:
- Frame rough opening per project requirements
 - Side jambs and header are typically anchored with #8 x 3" wood screws.
 - Metal studs should have wood blocking or similar at jambs and header or fasteners compatible with metal studs should be used.
 - Drywall thickness should be taken into account when framing the wall.
 - Care should be taken to ensure wall is square, level, and plumb.

WALL MUST BE FRAMED
SQUARE, LEVEL, AND PLUMB
